III. THE WAY FORWARD:

- OBSTACLES AND CHALLENGES:

Since the establishment of the Group, many efforts have been made to boost intra- OIC trade particularly in the fields of capacity building, trade facilitation, export credit insurance, support to SMEs, products and services promotion of the Member States but also the development of strategic products, namely food and energy products.

Despite these many efforts, the desired objectives are hardly achieved because of:

- ✓ Lack of implementation of regional integrated projects according to country priorities and the expertise of the Institutions of the Group and other development partners in the sub region;
- ✓ lack of investment in products with high trade potential ;
- ✓ The non- involvement of the private sector and trade promotion organs in projects and activities undertaken by the Group ;
- ✓ Work in silos of Institutions on their own projects and activities.

In order to further strengthen the intra-OIC trade, OIC institutions and their development partner should collaborate and execute joint projects by appointing focal points and managers of regional projects in the different value chains of products and services, in a bid to achieve the trade development of the Ummah. These include: Halal products and services (finance, food, cosmetics ...), the health sector (pharmaceutical and welfare), the education services and logistics, cotton products, textile and leather, renewable energy. The group members should also take part in various working groups of the COMCEC and contribute to the implementation of additional projects in the areas of cooperation strategy.

- ✓ To focus and enhance the marketing of the Consultative Group projects and activities for the benefit of the private sector through the relevant OIC private sector organizations;

- ✓ Hold marketing and communication days of services provided by the OIC Institutions of the Consultative Group for the benefit of public and private sectors to speed up the membership of some OIC Countries to the TPS/OIC Agreement and Protocols, the ICIEC, the OISA, and the SMICC.
- ✓ To improve coordination mechanism of the OIC Consultative Group with a view to enhancing its efficiency and performance, the following improvements shall be considered :
 - Implementation of the guidelines for cooperation adopted by the second OIC Consultative Group in Casablanca on 31st May- 1st June 2010;
 - The Group shall participate as such in the working groups of the COMCEC and regional initiatives such as aid for trade.
- To set up of a consultation and monitoring mechanism among the Regional Economic Groupings in order to enhance their cooperation and harmonise their regulations (notably: ECO, GCC, WAEMU, AMU, Agadir Agreement, GAFTA...) with a view to inviting them to join the Consultative Group Meetings;

NEW MODALITIES OF IMPLEMENTATION OF THE EXECUTIVE PROGRAMME:

The Executive Programme is the operational level of the roadmap adopted in July 2008 in Ankara by an expert Group Meeting; however the Program needs to be improved since a simple combination of different programs and activities to be put in place and implemented in parallel, which makes it very complex.

It was stressed that the Group shall conduct a comprehensive impact assessment of the activities adopted towards achieving the current target of 20% of intra-OIC trade by 2015. The assessment can be done according to the methodology developed by UNDP during this meeting and taking into account the following Key Performance Indicators:

- share of intra-OIC trade
- Ease of doing business index
- Logistic performance index
- Trade finance
- Nominal / Real Growth in trade
- Product and market diversification
- Level of utilization of Export Credit Insurance in Member Countries.

To better assess the impact of the Group's activities, it is useful to develop questionnaires for themes such as trade financing and export credit insurance, trade facilitation, trade promotion, the development of strategic products and capacity building. These questionnaires should be prepared by the OIC specialized institutions leaders of these themes, in collaboration with UNDP, ITC, UNIDO and UNCTAD with a view to submitting them to the Member States.
